

Washing Instructions for all our cleansers

Le Blanc cold water cleansers are proven safe and are highly recommended in the home textile industry. Their low-sudsing neutral pH formula makes it ideal for cleaning: all washable whites and colorfast natural fibers (100% linen & cotton), synthetics & blends. Safely launder: clothing, household linens, Egyptian cottons, cashmere, woolens, antique fibers, lace, baby items, silk, bamboo, all organic materials, down and more.

Each specialty wash we manufacture is made for laundering different fibers, so please check each product for usage. Do not use our products on imitation ecru, or fabrics that have been colored with herbal tints like tea stained ecru.

Use all of our products by itself with cool water. Do not pretreat or add other detergents or chemicals to the wash. Our product is the detergent. Our products will not remove coloring from any fabric if the item is colorfast. If concerned if a product is colorfast, test the article by dipping an unnoticeable area of the fabric in water and see if the color bleeds into the water. Always follow manufacturers care label or instructions when laundering.

STAIN REMOVING: Wet the entire item using cool or tepid water. Apply a few drops of product on the stain and gently rub the fabric against itself until the stain is almost removed. Follow by soaking the item in our products for at least twenty minutes and then hand or machine wash the entire item. Do not spot treat one area of the fabric without immediately washing the entire item with our product. Tough stains may require overnight soaking. When restoring antique linens, it is safe to soak the item for days, but we recommend that you change the water and add more cleanser to the basin daily.

HAND WASHING: Use a capful of cleanser in a basin of cool water and soak item for at least twenty minutes. Follow by rinsing the entire fabric thoroughly.

TOP LOADING MACHINE WASH: Adjust washing machine to the cold water temperature setting. Pour **Linen Wash** into the washer as it fills with water then add items being washed. Use ¼ cup per medium load.

FRONT LOADING HE MACHINE WASH: Load items and shut the door. Pour ¼ cup of **Linen Wash** into detergent receptacle on the front of the washing machine. Since all of our cleansers are low sudsing, 1/4 cup or less and the cool water temperature setting is recommended.

NOTE: KEEP OUT OF REACH OF CHILDREN. Not intended for internal use. If product is accidentally splashed in eyes, flush eyes liberally with water. If a small amount is accidentally ingested, drink five glasses of water over the next four hours. If irritation persists, consult an ophthalmologist, primary physician or go to an ER.
